

CargoWise Provides the Perfect Platform for Fast Growing Freight Consolidation Firm

-Evans introduces ediEnterprise Software to Improve Business Efficiency-

Sydney, Australia, June 7, 2011 — CargoWise®, a globally recognized technology supplier for logistics service providers has successfully completed implementation of its hosted ediEnterprise software solution with Evans International Freight Consolidators.

ediEnterprise is a single file unified platform solution that will enable Evans to automate and streamline the company's wholesale consolidation operations, accounts and management processes and provide value added services for its expanding list of freight forwarder customers.

"We needed a scalable solution", explains Lance Evans, Founder and Manager at Evans. "We're an extremely ambitious business that is actively recruiting new staff and expanding into new geographies. As our business changes, we will need a software solution that can change with us and CargoWise's ediEnterprise software is able to do that."

The new system is delivered through the CargoWise Hosting platform, so all critical information is stored in CargoWise's secure, purpose built data center in Sydney. Evans' employees will be able to access all the features and functionality of ediEnterprise from anywhere in the world, via the internet.

Established in September 2010, Evans already has operations in more than 7 countries including Australia and New Zealand – and expects rapid growth during the second half of 2011 after signing a major partnership deal with one of China's leading freight companies. With the combined benefits of CargoWise Hosting and ediEnterprise Evan's will be able to future proof for the anticipated acceleration in business results, and reduce total cost of ownership without capital expenditures thus freeing up working capital for expansion into new markets..

"Through our products and services, we aim to take the pain out of IT for our customers, said Debbie Boyce, Vice President Business Development Australasia for CargoWise." "Our ediEnterprise solution has provided Evans with the IT experts, the support and infrastructure to enable them to focus on their core business objectives."

CargoWise's suite of logistics software solutions have an extensive global user base, making it easier for international companies like Evans to overcome compatibility issues with other overseas partners, forwarders, ports and authorities.
